ABOUT COSMOS

Cosmos showcase a stunning gradient of colors, from deep magenta to pink to white. Whether grown from seed or planted using nursery starts, these captivating flowers are easy to cultivate. Their low-maintenance nature makes them a favorite among many, and they provide delightful cut flowers for arrangements.

WATER

Allow soil to dry out slightly between waterings

LIGHT

Full sun, 6+ hours per day

BLOOM TIME

Summer – Fall

MATURE SIZE

4-8 in. tall,
4-6 in. wide

FERTILIZATION

Cosmos do not require fertilizer. Fertilize only if they seem to be struggling on their own.

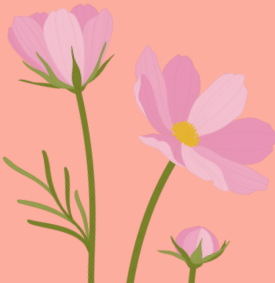

SOIL

Tolerant of poor soil and arid conditions

CARE TIPS:

If seed heads are left at the end of the season, cosmos will often reseed themselves and appear again next spring.

If cosmos seem to be struggling, fertilize with a solution high in phosphorous to help with bud formation. Avoid nitrogen-rich fertilizers as this can cause foliage growth to outweigh boom development.
