ABOUT IMPATIENS

Impatien flowers are widely favored as bedding plants, especially for shady areas. They're also a popular choice for container gardens, adding color to hanging baskets and window boxes. These beauties are low-maintenance and don't require pinching, making them a hassle-free addition to any garden.

WATER

Keep soil evenly moist, but never soggy

LIGHT

Partial shade,
2-4 hours filtered
sunlight

BLOOM TIME

Summer - Fall

MATURE SIZE

6-36 in. tall,
12-36 in. wide

FERTILIZATION

Fertilize with a water soluble fertilizer every week. **Always follow package instructions.**

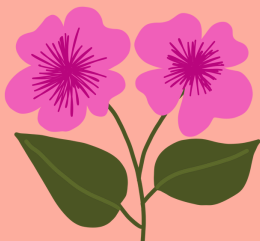

SOIL

Prefers moist, well-draining soil rich in organic matter

CARE TIPS:

Container-grown plants typically require more fertilizer and water than those planted in the ground.

Morning sun and afternoon shade is ideal for these plants. Too much sun will scorch these plants, but too heavy of shade will result in leggy growth with less blooms.
